

# Transforming Education: Empowering Institutions with Multi-Site Solutions

Join us in  
revolutionizing  
educational landscapes

# Agenda

- Multisite solution benefits
- CiviCRM installed on multisite - what organizations it can be used for?
- Project tasks and challenges
- What solutions were suggested?
- Multisite engineering solution
- Functionality demonstration
- Q/A session

# Why Multisite?

- **Centralized Management** – manage multiple CiviCRM instances from a single administrative interface
- **Cost effectiveness** – enables you to share resources such as hosting, licenses, and maintenance costs across multiple sites
- **Consistent Branding and Design** - maintain consistent branding across all websites, while still customizing at the individual site level.
- **Scalability** – as your organization grows it allows you to easily deploy additional sites without the need for separate installations
- **Enhanced Collaboration** – facilitate collaboration and data sharing between different departments within an organization
- **Simplified User Management** – User accounts, permissions, and access control can be managed centrally in a multisite setup

# What organizations Multisite can be used for?

Nonprofit  
Networks

Healthcare  
Institutions

Government  
authorities

Religious  
organizations

Hospitality and  
Recreation

Arts and  
Culture

Humanitarian  
Aid

Environment  
protection

Educational  
Institutions

# Project tasks and challenges

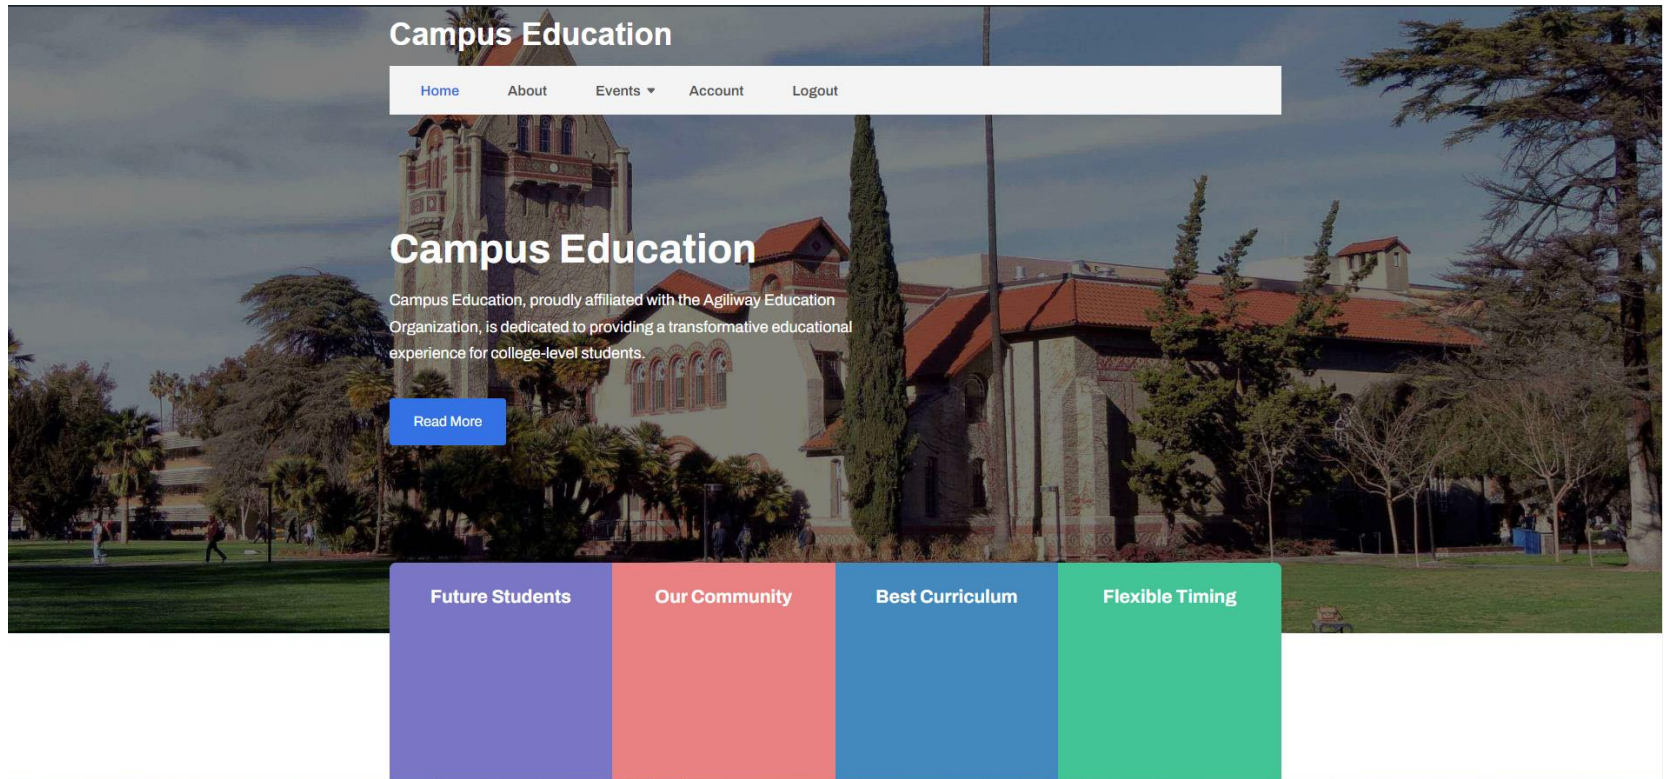

- a pre-existing system lacking a clear vision of implementation specifics from the client;
- importing alumni contacts from school district administrations and integrating them into the system.
- incorporating social networking features, the client needed, as they aimed to expand and scale the solution;
- adding role management feature;
- the client's proposal to create separate instances for each state, leading to potential management and scalability issues.

# What Solutions Were Suggested?

- deploying a multidomain CiviCRM on AWS
- consolidating multiple schools under one CRM instance for simpler support and maintenance
- group segmentation and categorization were optimized to accommodate a growing network of schools, enhancing scalability and cost-efficiency;
- user profiles were tailored to facilitate future categorization and filtering, allowing targeted communication and information access;

# Educational Institutions by Agiliway

<https://earlylearning.education.agiliway.com/>

The screenshot shows the homepage of the Early Learning Education website. At the top left, the text "EARLYLEARNING EDUCATION" is displayed in a light green font. To the right, a navigation menu includes "Home", "About", "Events" (with a dropdown arrow), "Account", and "Logout". The main visual is a large photograph of a teacher interacting with a group of young children sitting on a blue rug. Overlaid on this image is the text "EARLY LEARNING KINDERGARTEN" in a white, serif font. Below this, a smaller line of text reads: "Early Learning Kindergarten, part of the Agiliway Education Organization, is dedicated to providing a nurturing and stimulating environment for young...". A green "READ MORE" button is positioned below the text. At the bottom of the page, there are four colored rectangular boxes, each containing a white circle with a black peace sign icon and a text label: "ACTIVE LEARNING" (blue box), "EXPERT TEACHERS" (green box), "STRATEGY LOCATION" (red box), and "FULL DAY PROGRAMS" (yellow box).
